

# THE “HEALING PULSE” OF THE “PLANET EARTH”

“The fact is that when the frequency of your DNA hits the Schumann Resonance, your experience of time stops completely. These are truths that are still experienced and embodied by many of the indigenous cultures alive on our planet today. To live closely to the earth’s natural rhythms is to experience the wisdom and clarity that comes of moving more slowly through the world.”

~ **Richard Rudd**

- Have you ever wondered how the Earth's magnetic field affects our bodies and minds?
- Do you want to know more about this subtle yet powerful frequency that surrounds us daily?

The Earth's natural frequency has been a subject of fascination for scientists for decades due to its promising benefits for humans.

LIFE CREATION

# The Schumann Frequency of Resonance

Schumann resonance is a natural electromagnetic frequency generated by the Earth's magnetic field. It was discovered by German physicist Winfried Otto Schumann in 1952, who first predicted the existence of a natural extremely low-frequency field of about 7.83 Hz called the Schumann resonance (SR) frequency in earth's atmosphere that globally propagates electromagnetic field (EMF) waves.

The Schumann Frequency of 7.83 Hz is the frequency of the Earth; the frequency of a mother's beating heart which is the first thing all of us first heard at the precise moment of our birth!

It is the "Love" Frequency, the ultimate tool of healing ever given to us by our Creator.

Schumann resonance is a weak electromagnetic signal, having an amplitude of only a few microvolts per meter. This natural resonance is created by bouncing electromagnetic waves between the Earth's surface and the ionosphere, forming a spherical waveguide.

Lightning strikes and solar flares further excite these frequencies, leading to a standing wave pattern in the Earth's atmosphere. These frequencies fluctuate depending on geographical location, lightning, solar flares, atmospheric ionization, and daily cycles.

# What Frequency Is Schumann?

Schumann resonance is not a fixed frequency but an average number of global readings. Typically, the frequency of Schumann resonance is calculated by the distance between the Earth's surface and the ionosphere.

The primary frequency of Schumann resonance is around 7.83 Hz and has several harmonic frequencies, including 14.07 Hz, 20.25 Hz, 26.41 Hz, and 32.45 Hz.

The frequency 7.83 has been called the heartbeat of mother earth. It is the prime broadcasting frequency for our body, mind, and cells. Every living thing on Earth is tuned to this frequency and its harmonics, making it the most crucial aspect of Earth's PEMFs in sustaining life.

# Schumann Resonance and its impact on Human Health

Schumann resonance is critical for maintaining the balance and stability of the earth's electromagnetic environment. It is also linked to the normal functioning of the human brain and body. While research on the benefits of Schumann resonance is ongoing, multiple studies suggest that the Schumann frequency of 7.83 Hz positively affects human health and well-being. It has been linked to improved cognitive functions, reduced stress and anxiety, enhanced immune function, sleep function, and much more.

The research found that lack of exposure to the earth's magnetic field (Schumann resonance) was a significant contributor factor to symptoms such as fatigue, depression, bone loss, and weightlessness in astronauts returning from this space.

**Here are some scientifically proven benefits of Schumann resonance:**

## • Improves Wound Healing

Schumann resonance enhances the body's natural healing processes and reduces stress and inflammation. One study concluded that extremely low-frequency electromagnetic fields (ELF-EMF) have promising effects on wound healing by effectively modulating various phases. The effects are directly dependent on factors like waveform, frequency, amplitude, and duration of exposure.

## • Enhances Intelligence

The Schumann resonance is an essential factor in maintaining cognitive function. A study also suggested that Schumann resonance provides the brain with a matching electromagnetic frequency range for synchronization, which is essential for rapid intelligence and reaction. It aids the brain in rapidly transmitting information and increases overall intelligence.

- **Promotes Relaxation and Better Sleep**

Researchers have also found a deep connection between Earth's magnetic frequencies with our brains. A study concluded significant similarities exist between the spectral patterns and strength of electromagnetic fields generated by the human brain and the Earth's ionospheric cavity.

Our brain operates in four primary states of consciousness within the frequency range of 0-30 Hz. The alpha state of the brain ranges from 8-12 Hz, which is close to the primary harmonic of the Schumann frequency. This brain state is associated with relaxation, improved focus, healing, and sleep. So, when the brain is naturally tuned to this frequency, it benefits brain function and overall well-being.

# Takeaway

Schumann resonance is Earth's natural electromagnetic frequency which is essential for maintaining the balance of Earth's atmosphere and the health of all living organisms.

The Schumann frequency of 7.83 Hz is vital for the human brain and body, and prolonged lack of exposure to this frequency can lead to certain problems.

It has the potential to offer natural and non-invasive means of enhancing physical and mental well-being, reducing stress, and promoting relaxation and healing.

We can get reconnected with this healing frequency which creates a microbiome purifying the air, water, and soil from contamination where we live; and help transmute (change to harmless) chemtrails.

This 7.83 Hz Schumann frequency, combined with detoxing with sulfur and other healing substances is our best total protection from being sickened and biologically chipped via the genetically engineered Morgellons parasites (including Carambola) being sprayed on us by aircraft.

## Agnihotra Principle and Miracle Ash

The technical principle of Agnihotra is very definite. The Vedic principle talks about "Pushtivardhana" where "Pushti" is nutrition. During sunrise and sunset conditions are created and there is surge of lot of energies coming towards earth and hitting earth exactly where the sun is rising or setting. At that point of time a huge column of energy is created going right up to 12 kms to the sky and when it descends back again it carries a lot of nutritious stuff.

Science has two dimensions to the healing properties of Agnihotra. One is the clinical dimension, and the other is the empirical dimension.

Millions of people have been healed physically, mentally, intellectually, emotionally and in all other aspects of human life. It has a holistic effect on the human existence.

The second is the impact on the environment. The major issue today is the environment outside as well as the environment within the human existence, that is the mind and the emotions. It has been observed that within an area of almost 100 sq. mt. the impact is so strong that even the plant kingdom gets benefited. In the ecological environment, the balance is well maintained by Agnihotra. This is not only been proved by scientific measurement but also in terms of life experiences of many people. The easiest way is to find out what happens to human body during and after Agnihotra.

It has been told from the Vedic times that the sunrise and sunset times are the two very important times that reset the cycle of one's life, especially breathing. Breathing is the core of human existence. Both the nostrils start functioning at these times and this is the reason that since age old times elders have been telling not to sleep around this time. People should be awake at the time of sunrise and sunset. This is the time where one gets an opportunity to start your rhythmic breathing, balanced breathing and that sets the tone for the whole day and if this opportunity is missed the imbalance will be carried throughout the day.

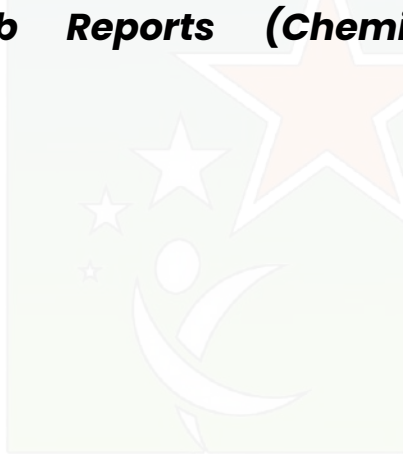

It has been found that the Agnihotra ash which is left behind is far more superior chemically. The chemical analysis of Agnihotra ash has unexplainable properties. The ash is nothing but a combination of rice grains, Indian breed cows' ghee (clarified butter made from Indian cow's milk), the copper vessel and Indian cow's dung. In the chemical composition of these ingredients there is maximum of 34 chemical elements present. But something surprising happens when you burn together at sunrise time. If it is analysed, the ash which is formed after the Agnihotra will have 92 chemical elements. Scientists are puzzled as to where this additional 58 elements came from. Because of this unusual phenomenon it has been called as miracle ash.

# Author Bio

Dr. Debi Prasad Acharjya got his basic education from Christ Church Boy's School, Jabalpur (Madhya Pradesh) and graduated from St. Aloysius College (Jabalpur University, Madhya Pradesh) in B.Sc. by being a Gold Medalist. Later he completed his Post Graduate Diploma in Systems Management from NIIT, Kolkata. He is a Certified Law of Attraction Basic Practitioner from Global Sciences Foundation, USA. He is a certified Emotional Freedom Technique (EFT) Consultant from Vitality Living College, UK and has a Certificate in Medical Transcription.

**Dr. Debi Prasad Acharjya**

He is a Graduate of "Landmark Forum." Dr. Acharjya is a former officer of Canara Bank, one of the most respected financial institutions of India. He also has a Diploma in Cellular Nutrition Therapy (DCNT) from "The Open International University for Complementary Medicines", Colombo, Sri Lanka. For his significant contribution in the field of "Wellness and Well Being," he has been awarded Honorary Doctorate by the Medicina Alternativa, affiliated to The Open International University of Colombo, Sri Lanka.

He is an International Hydration Specialist and has been awarded the certificate of "Hydrogen Advisor" from the "Molecular Hydrogen Institute (MHI)." The institute is the epicenter of hydrogen education and training and is the leading educational source for individuals interested in accurately sharing the scientific evidence regarding the therapeutic benefits of H<sub>2</sub> gas.

As an Ambassador of Global Health and Wellness and with years of experience and the multitude of resources, he guides people to understand what exactly is needed to acquire a healthy life at any age! As a Wellness Coach he has transformed lives of thousands of people. Working with Dr. Acharjya is a learning experience; say his beneficiaries with a sense of pride and fulfillment.
